

Wah, Axcel school really got a lot of best program, I tell you. Every time got new activity, sure very syiok one. Last time I join the project, wah, so fun lah! Can do many thing, not just sit down study like other school. Here, can learn new skill, work with friend, and even got chance go outside help people. That one really good, make me feel like I doing something useful, not just study for exam only.

The teacher also very steady, always support us. If we blur blur don't know how to do, they will help and explain until we understand. Group project also damn best, can teamwork with friend, sometime got argue a bit lah, but in the end still fun. Some program like business challenge or AI project, wah, make me feel like real entrepreneur already. At first a bit susah, but after try, become more geng.

Also, Axcel always got event like sports day, charity project, and even dodgeball competition. That one confirm my favorite! Play until sweat like crazy, but really enjoy. Then also got some program help us improve skill, like presentation or leadership training. That one last time I scared, but now I more confident liao.

Overall, I really say Axcel school program very good one. Not just normal study, but also teach us many real-world thing. Got challenge, got fun, got friend, everything balance. Join here no regret lah!
