2025 Dec - March

Cloudedge
Technology (Full-Stack
Developer)

Projects Stock Management

System:

Developed a Stock Management System to efficiently track inventory, manage stock levels, and streamline product management using PHP, MySQL, and MVC architecture.

Travel Management System:

Developed a Travel Management System to track rental vehicles, manage bookings, generate invoices, and automate duty slip and bill generation using PHP, MySQL, and MVC architecture.

2023 August - 2024

September

Anyhow
infosystems(Software
Developer)

Developed OpenCart Extensions:

ClickPost Shipping(Third party API integration): Designed and implemented an extension to integrate Click Post shipping services with OpenCart, enhancing shipping efficiency and tracking capabilities for online stores. **Multi-Source**

Inventory Management: Created a robust extension that enables multi-source inventory tracking and management, allowing businesses to streamline operations across multiple warehouses and locations.

Custom API Development for Magento 2:

Developed custom APIs for Magento 2, enabling seamless integration with Magento Native Apps. This involved creating endpoints for managing product data, orders, and customer interactions, improving the overall functionality and user experience of the mobile application.
