Code Unnati program certified by SAP   2022 - 2023

Code Unnati, a CSR initiative by SAP India, offers technical training in Industry 4.0 technologies like AI, ML, Cloud Computing, and SAP BTP.

Projects

Business Management System

Contributed to the development of a world-class, integrated e-commerce ecosystem to support businesses in expanding their digital operations. The solution featured cutting-edge infrastructure, innovative logistics and access to a strategic market network, driving international trade. Key contributions include:

- Played a key role in the project from the beginning, defining structure and development approach using Liferay for the backend and React for the frontend.
- Managed content with Liferay, while implementing a dynamic user interface with React
- Developed interactive, dynamic forms using React to enhance user experience and data capture.
- Designed advanced search and filtering functionality, integrating React for interactivity and Liferay for back-end processing.
- Liferay OAuth token used for secure authentication and authorization in API calls, ensuring robust security for user data and interactions.
- Participated in code reviews to maintain quality and ensure alignment with coding standards.
- Managed tasks, tracked project progress, and divided responsibilities across a team using Azure JIRA boards and Git for version control.
- Tools used: React.js (front end), HTML, CSS, Liferay (CMS, back end)

Multi-Line Insurance & Financial Services Website Migration

Contributed to migrating a multi-line insurance and financial services website to a newer version of Liferay, improving its performance, security, and functionality. This platform offered a comprehensive range of services including insurance, pensions, investments, broking, healthcare management, and medical services. Key contributions include:

- Played a key role in migrating the website from an older version of Liferay to the latest version, ensuring a seamless transition with minimal disruptions.
- Assisted in optimizing Liferay CMS components to improve content management processes and enhance site performance.
- Supported the team in resolving compatibility issues during migration, ensuring all website features functioned as expected post-upgrade.
- Helped implement new Liferay functionalities to enhance scalability and meet business requirements.
- Engaged in code reviews and ensured adherence to best practices for efficient and high-quality development.
- Tools used: Liferay (CMS, back end), React

DentalCare Web Application

Developed the DentalCare web application to provide an intuitive platform for displaying dental services and offering basic functionalities. The application features a clean, responsive design, focused on delivering a seamless user experience. Key contributions include:

- Built the DentalCare app using React to create a dynamic, single-page application with a smooth user interface.
- Designed a responsive layout using HTML, CSS, and Bootstrap, ensuring the app is optimized for various devices and screen sizes.
- Developed key features, including service listings, appointment forms, and contact forms for user interaction.
- Tools used: React.js, HTML, CSS, Bootstrap.

Skills

Frameworks and Languages: Liferay, JavaScript

Web Development: React JS, Redux Toolkit

UI Development: HTML, CSS, SCSS, Bootstrap, ClayUI, MaterialUI, TailwindCss.

Databases: MySQL

Version Control: Gitlab, GitHub, Azure
